Memory Information and Procedures

Product: M9614A/15A

Date: 2020/6/26

Memory Type: Flash Memory	Memory Size: 32 MByte
Memory Function: Stores module serial number, cal verify date, and calibration data.	
User Modifiable (Y/N): N	Volatile (Y/N): N
Memory Erase Processes: None, this is not user accessible.	

Memory Type: Flash Memory	Memory Size: 32 MByte
Memory Function: Instrument operation FPGA configuration data. Images can be changed using the Keysight Soft Front Panel firmware update utility.	
User Modifiable (Y/N): N	Volatile (Y/N): N
Memory Erase Processes: None, this is not user accessible.	

Memory Type: Flash Memory	Memory Size: 32 MByte
Memory Function: Hardware control FPGA configuration data. Images can be changed using the Keysight Soft Front Panel firmware update utility.	
User Modifiable (Y/N): N	Volatile (Y/N): N
Memory Erase Processes: None, this is not user accessible.	

Select one of the following:

- ☒ **Sanitization process is documented above**
- ☐ Sanitization process could be available with engineering resources
- ☐ Sanitization process is not possible (i.e. sanitize the product by destruction)
